

## DRY DOCKING JOBS OF 81MTR X 13.4MTR X 5MTR CARGO

### PROJECT DETAILS:

Title	: DRY DOCKING JOBS
Location	: DUBAI MARITIME CITY
Vessel	: MT HAMTA
Owner	: FADAK MARINE SHIPPING
Length	: 81 Meters
Breadth	: 13.4 Meters
Depth	: 5 Meters
GRT	: 1342 T
DWT	: 3041 T

The Cargo Vessel **HAMTA** arrived in Dubai Maritime City on September 19,2023, to undergo dry docking jobs with **NORDMARIN LLC** as the main contractor. The Cargo Vessel docked on September 20,2023 and **NORDMARIN LLC** provided dry docking jobs and general services for the vessel.

**NORDMARIN LLC** accomplished a significant docking operation, conducting a major overhaul of the Controllable Pitch Propeller (CPP) due to vibrations observed after a previous docking by another ship repair company. The improper installation of the CPP by the previous company became apparent upon removal, prompting the client to shift the task to **NORDMARIN**'s workshop. The meticulous process involved renewing critical components such as sliding shoes, blade seating areas, and main seals. Our specialists expertly repaired damaged CPP blades, ensuring their satisfactory working condition upon reinstallation. Additionally, the project encompassed hydroblasting and painting of the hull using Jotun paint, further enhancing and protecting the vessel's underwater areas. **NORDMARIN LLC**'s commitment to addressing underlying issues and delivering comprehensive solutions is evident in the successful completion of this intricate CPP overhaul.

**HAMTA** was undocked on November 15,2023. After all jobs completed to the full satisfaction of the client, vessel sailed out from Dubai Maritime City on November 20,2023.
